He also authored reader and spelling books that dominated the American market at the time. He spent decades of research in compiling his dictionaries. His first dictionary, A Compendious Dictionary of the English Language, appeared in 1806. In it, he popularized features that would become a hallmark of American English spelling and it also included technical terms from the arts and sciences rather than confining his dictionary to literary words. In A Companion to the American Revolution (2008), John Algeo notes: "it is often assumed that characteristically American spellings were invented by Noah Webster. He was very influential in popularizing certain spellings in America, but he did not originate them. Rather he chose already existing options such as center, color and check on such grounds as simplicity, analogy or etymology". In William Shakespeare's first folios, for example, spellings such as center and color are the most common. He spent the next two decades working to expand his dictionary. Some 110,000 words from the Webster's Unabridged Dictionary is included in this publication. Nave's Topical Bible Concordance; Nave's Topical Bible Concordance is written by Orville James Nave (1841-1917). Nave, a chaplain in the United States Army, referred to his work as "the result of fourteen years of delight and untiring study of the Word of God." It is a topical concordance of the Bible, and contains Biblical references to 5320 topics. Scripture is quoted over 100,000 times; the same Scripture citation may appear under several headings. It took 14 years to complete. Hitchcock's Bible Names Dictionary; This dictionary is from "Hitchcock's New and Complete Analysis of the Holy Bible," written by Roswell D. Hitchcock in 1869. It contains 2737 entries from the Bible and Bible-related proper names and their meanings. Easton's Bible Dictionary; Easton's Bible Dictionary is a reference work on topics related to the Christian Bible authored by Matthew George Easton. The first edition was published in 1893 and a revised edition was published the following year. The most popular edition, however, was the third, which was published by Thomas Nelson in 1897, three years after Easton's death. This edition contains 3924 entries relating to the Bible from a 19th-century perspective. Many of the entries in Easton's are encyclopedic in nature, although there are also short dictionary-type entries. Word Usage Section; The Word Usage Section is a list of topics, names and definitions used throughout The Biblical texts. The topics chosen from are the ones in the dictionaries included with this publication. Hebrew Strongs Concordance; The Hebrew Strongs are the 8674 Hebrew root words as used in the Old Testament. It is part of the Strong's Concordance, an index of every word in the King James Version, constructed under the direction of James Strong. Greek Strongs Concordance; The Greek Strongs are the 5523 Greek root words as used in the New Testament. It is part of the Strong's Concordance, an index of every word in the King James Version, constructed under the direction of James Strong.
